

# JULIO CESAR DE FARIA JUNIOR

## System Administrator | Cloud Engineer | IT Operations | Infrastructure Support

São José dos Campos, SP, Brazil | Remote / Hybrid / On-site | +55 12 98247-3571 | [juliovdk@gmail.com](mailto:juliovdk@gmail.com) | [LinkedIn](#) | [Credly](#)

### PROFESSIONAL SUMMARY

System Administrator and Cloud-focused IT Operations professional with 7+ years of experience supporting, maintaining, and troubleshooting corporate IT environments across infrastructure, service desk, identity, networking, monitoring, and cloud operations. Hands-on background with Windows, Windows Server, Linux, macOS, Active Directory, Microsoft 365, Google Workspace, VPN, DNS, DHCP, Wi-Fi, routers, switches, Hyper-V, Proxmox, NAS, backup routines, and remote support. Experienced with Azure, AWS, and GCP in operational support, access management, monitoring, and troubleshooting scenarios, with exposure to Docker, Jenkins, Terraform, Ansible, and Kubernetes. Strong ability to stabilize environments, document procedures, follow SLAs, escalate complex issues, automate repetitive tasks, and work with infrastructure, security, vendors, and business teams in local or international environments.

### CORE TECHNICAL SKILLS

**Systems Administration:** Windows Server, Linux, macOS, Active Directory, IAM, permissions, groups, user lifecycle, onboarding/offboarding

**Networking & Security:** TCP/IP, DNS, DHCP, VPN, Wi-Fi, routers, switches, UniFi, Fortinet/FortiGate, Sophos VPN, access policies

**Infrastructure & Backup:** Hyper-V, Proxmox, NAS, backup and recovery routines, asset inventory, vendors, preventive maintenance

**Scripting & Automation:** PowerShell, Bash, Python, operational automation, standardization, process improvement

**Cloud & DevOps Operations:** Azure, AWS, GCP, Docker, Jenkins, Terraform, Ansible, Kubernetes fundamentals, operational troubleshooting

**Monitoring & Reliability:** Zabbix, Grafana, Datadog, Wazuh, Graylog, ManageEngine, alerts, incident visibility, availability support

**ITSM & Support:** L1/L2/L3 support, Jira, GLPI, incident/request management, SLA tracking, escalation, knowledge base documentation

**Productivity & SaaS:** Microsoft 365, Outlook, Teams, SharePoint Online, Google Workspace, Slack, GitHub, Notion, Metabase, Power BI

### PROFESSIONAL EXPERIENCE

#### IT Specialist — Grupo CW Firpo | Nov 2024 - Dec 2025

- Supported corporate IT operations across infrastructure, users, servers, networks, access controls, assets, vendors, and internal documentation.
- Monitored and maintained servers, networks, and corporate environments with focus on availability, stability, performance, and operational continuity.
- Managed user access, permissions, IT assets, vendor interactions, and technical procedures, supporting internal controls and organized operations.
- Supported backup, recovery, continuity simulations, and reporting routines related to performance, security, access, costs, and infrastructure status.
- Performed preventive and corrective troubleshooting, escalated complex issues, reduced recurring incidents, and improved operational processes.

#### IT Security Administrator — MeedBr | Apr 2024 - Aug 2024

- Worked across IT support, security operations, access control, VPN, monitoring, event analysis, and incident response routines.
- Monitored alerts and incidents using Wazuh, ManageEngine, Graylog, Zabbix, and Grafana, improving visibility and response tracking.
- Administered and troubleshot VPN, firewall, and security solutions, including Sophos, Fortinet/FortiGate, and access control processes.
- Registered, analyzed, and escalated incidents according to SLA expectations, improving traceability, documentation, and operational reliability.
- Supported internal documentation and practices related to LGPD/GDPR, access governance, and security operations.

#### IT Support Analyst / ITOps — Quero Educação | Jun 2021 - Aug 2023

- Provided remote and on-site technical support to 1,000+ users, resolving hardware, software, access, network, SaaS, and infrastructure issues.
- Managed tickets through Jira, including triage, prioritization, communication, escalation, and follow-up for incidents and service requests.
- Administered and supported Google Workspace, Microsoft 365, Slack, Jira, GitHub, Notion, Metabase, Power BI, and other SaaS tools.
- Supported IAM routines, including account creation/removal, permissions, groups, internal systems access, and onboarding/offboarding processes.
- Worked with AWS, Azure, and GCP in operational support, monitoring, troubleshooting, and infrastructure-related routines.
- Implemented and maintained monitoring with Zabbix and alert integrations, improving incident visibility and service availability.
- Created documentation, standards, and operational automations to improve efficiency, reduce rework, and enhance the user experience.

#### IT Support Trainee / IT Support Analyst — Fundação Cultural Cassiano Ricardo | Feb 2018 - Jan 2019

- Delivered end-user support in a corporate environment with Windows and macOS workstations, printers, internal systems, local networks, and productivity software.
- Performed basic Active Directory administration, including groups, users, policies, permissions, and corporate email support with Zimbra and Outlook.
- Configured and maintained Windows Server environments, pfSense, remote access with TightVNC, and preventive maintenance routines.
- Created and deployed network images with Ghost, supported equipment inventory, and trained users on internal tools and best practices.

### EDUCATION

- Associate Degree in Computer Networks - Universidade Anhembí Morumbi, 2022
- Associate Degree in Systems Analysis and Development - FATEC São José dos Campos, 2020

## **CERTIFICATIONS**

- Microsoft Certified: Azure Fundamentals (AZ-900)
- SnowPro Platform Associate Certified
- Fortinet Certified Associate in Cybersecurity
- Datadog Foundation

## **LANGUAGES**

- Portuguese - Native
- English - Upper Intermediate (B2)
- Italian - Elementary / Intermediate (A2/B1)

## **AVAILABILITY**

- Available for System Administrator, Cloud Engineer, Cloud Support, IT Operations, Infrastructure, and Technical Support roles.
- Open to remote, hybrid, or on-site models, including international teams and different time zones according to business needs.
